

REMOTE DISPLAY

SHOW THE WEIGHT OUTSIDE THE CABIN

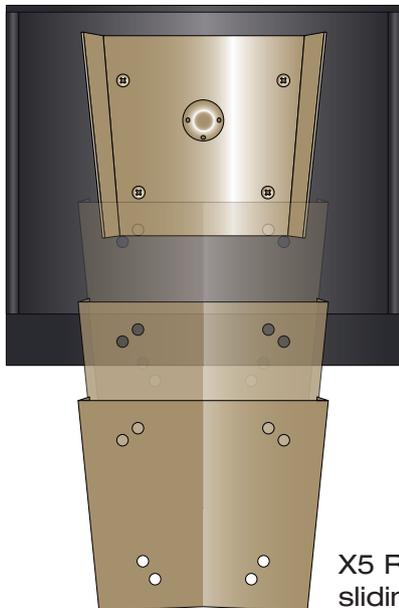

FOR REAL TIME APPLICATIONS

REMOTE DISPLAY

BRING YOUR WEIGHT LIVE OUTSIDE THE CABIN

The REMOTE DISPLAY helps in those situations where the weight must be shown live outside the cabin. When loading a truck your customer have a real time knowledge of how much weight you are unloading into the truck. When loading bags from a hopper or conveyor the discharge can be remotely stopped at the desired weight; applicable in Static weighing mode, only. With an ADT truck equipped with Millennium5 the REMOTE DISPLAY shows the real time weight to the loading machine which can then better achieve loading up to the maximum capacity.

X5 Remote Display sliding bracket

HARDWARE FEATURES

Display	9 ÷ 32 Vdc
Operating temperature	-15 ÷ +60 °C
Protection rating	IP65
Dimensions	248x228x120
Display	Backlit 60mm height LCD
Installation	Outdoor

SOFTWARE FEATURES

Communication Protocol	Partial Weight only
	Total Weight only

The remote Display is supplied with 10m of cable to plug into the X5.
